EXAMINER'S AMENDMENT/REASONS FOR ALLOWANCE

Drawings

1. The formal drawings submitted on 04/23/2002 were for the wrong application. The coversheet indicates the correct serial number (10/046,536), but the drawings themselves are marked with application number 09/973,733. The correct formal drawings must be submitted.
2. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
4. Authorization for this examiner's amendment was given in a telephone interview with H. Warren Burman, Jr. on 1/20/06.

5. The application has been amended as follows: in claim 13, line 3, replace the phrase "sampled at two or more different system sampling rates," with the phrase – sampled at one of at least two different system sampling rates,--.

Reasons for Allowance

6. Claims 1-26 are allowed.

It is noted that the closest prior art of record, Berkow et al. ("Measuring Sound: Selecting the FFT Size" Vol. 26, No. 1, 1998), teaches the use of multiple FFTs at different sampling rates to analyze a sound signal, but Berkow et al. do not teach the analysis of speech at one of at least two different system sample rates with a first spectral analyzer for analyzing speech up to a first frequency and a second spectral analyzer for analyzing the speech signal at least above the first signal, as indicated in claims 1, 12, 14, 20, 22, 23; nor do Berkow et al. teach the sampling of speech at one of at least two different system rates and analyzing the speech signal up to a first frequency obtaining one or more acoustic parameters, and obtaining one or more further acoustic parameters by analyzing the speech signal at least above the first frequency, as indicated in claim 13; nor do Berkow et al. teach analyzing a speech signal in a spectral domain which is sampled at one of at least two different system sampling rates with a first spectral analyzer for analyzing the speech signal in a lower spectral range up to an upper frequency limit and a second spectral analyzer for analyzing the speech signal, the second spectral analyzer being arranged in parallel to the first spectral analyzer, as indicted in claim 11.

Thus, independent claims 1, 11, 12, 13, 14, 20, 22, and 23 are allowable over the prior art of record because the cited prior art alone or in combination, does not fairly suggest or disclose the claimed combination of features.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement for Reasons of Allowance."
